

DSC Help Guide for Teachers:

Step 4: Assesslet Results

Timeline for Results:

Multiple Choice items are scored automatically. Multiple choice Results may be viewed immediately by clicking on the Live Responses button or by viewing individual student response cards.

GCA raters will assign points and provide feedback to student response items within 1-4 business days.

Assesslets with the *Complete* status have been scored. At that time, Results with feedback are available in the teachers', school administrators' and students' accounts. Parents may log into student's accounts to view Results

Overall Scores:

The percentages on the report view is mainly a threshold that was created. Overall percentages ranging from 0%-69% will appear on the main report view in red. Overall percentages ranging from 70%-100% will appear on the main report view in green. The best way to interpret student results is based on how students performed on specific items found in the Action Analysis, Standard Analysis, Response Analysis, and Activity Summary Report.

Use Data to Drive Instruction:

DSC provides teachers with several different reports to help interpret data and drive instruction.

Standards Analysis Reports allow teachers to view comparative data at the district, school and teacher level. Teachers may drill down to the individual class level to view standards performance data.

See Guide: [Standards Analysis Reports for Teachers](#)

Action Analysis Reports allow teachers to view comparative data at the district, school and teacher level for items or tasks, called actions, within an activity. Teachers may drill down to the individual class level to view analysis data, as well as, students' response data

See Guide: [Action Analysis Reports for Teachers](#)

Response Analysis Report allows teachers to view the distribution of student responses along with any feedback for each response or scored item.

See Guide: [Response Analysis Reports for Teachers](#)

Activity Summary allows Administrators and Teachers to drill down to an individual student's response data for an activity.

See Guide: [Activity Summary for Teachers](#)

DSC Help Guide for Teachers:

Step 4: Assesslet Results

Students Viewing Individual Results:

Students and parents can view results by logging into the student's District and School Connect account.

See GCA Guides: [Parents' Guide to Viewing GCA Assesslet Results](#) and

[Student Login and Account Information](#)

Note: While teachers have the ability to print student responses to send home, students and parents have more detailed information available by logging in to the student's account.
